DETAILED ACTION

Status of Claims

Claims 1-23 are pending in this Office Action.

Election/Restrictions

- I. Restriction to one of the following inventions is required under 35 U.S.C. 121:
 - I. Claims 1-11, drawn to communicating between two terminals, classified in class 709, subclass 249.
 - II. Claims 12-18, drawn to establishing connection with a network, classified in class 709, subclass 227.
 - III. Claims 19-23, drawn to controlling communications between two terminals, classified in class 709, subclass 223.

The inventions are distinct, each from the other because of the following reasons:

Inventions in Groups I, II and III are related as subcombinations disclosed as usable together in a single combination. The subcombinations are distinct from each other if they are shown to be separately usable. In the instant case, invention in Group I has separate utility such as a method for communicating between two terminals. See MPEP § 806.05(d). Invention in Group II has separate utility such as establishing connection with a network. Group III has separate utility because it provides control for communicating between two terminals. Because these inventions are distinct for the reasons given above and have acquired a separate status in

the art as shown by their different classification, restriction for examination purposes as indicated is proper.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
